

### The Ribstone Systems' Suite of Document Capture and Processing Solutions for Canon Multifunction Products:

Ribstone Systems is changing the way companies process documents with patent-pending innovative products that integrate seamlessly into your existing production workflow. Our cutting edge software enables you to meet the challenge of providing profitable document scanning services in a photocopy environment.

### Ribstone Systems is Image Capture and Processing Simplified

**Canon**  
imageRUNNER

**Ribstone**  
SYSTEMS

#### Ribstone Capture System

**Ribstone Capture** is an easy-to-use, kiosk-based, document imaging application designed for the photocopy production environment.

When coupled with the Canon imageRUNNER, this intuitive turnkey system gives your business the flexibility to provide document imaging and processing services while reducing costs and increasing productivity. The interface is so easy-to-use that your production staff will be able to perform imaging jobs quickly and efficiently. The system is easily installed, configured and networked.

This application allows for order management of high-volume scanning and complex image processing jobs.

#### Ribstone Scan-to-Print

**Ribstone Scan-to-Print** is an easy-to-use, kiosk-based application for the simultaneous creation of paginated (Bates numbered) photocopies from electronic files.

Utilizing the Scan-to-Print solution, operators are able to scan, print, Bates number (paginate) and create data files with just one pass of an original document.

This product is ideal for providers who need to create an instant print set with Bates numbers.

Ribstone Cost Recovery option: Export billing data to a network computer and place that data in a spreadsheet application.

#### Ribstone Image Printer

**Ribstone Image-Printer** is an easy-to-use, kiosk based application for creating instant "blowback" sets from CD-Rom or from any network drive.

Blowback sets can be produced for, TIFFs, MTIFFs or PDF files. Images can be endorsed and loadfiles can be edited.

Print sets can be produced with slipsheets and machine staples to mark document breaks, TIFF or PDF files at machine-rated speeds.

Ribstone Cost Recovery option: Export billing data to a network computer and place that data in a spreadsheet application.

# Ribstone SYSTEMS

Document Capture & Processing Solutions

## Ribstone Capture System Features

- Capture images at machine rated speeds
- Endorsing (Bates numbering)
- Loadfiles for litigation target systems
- Import images from CD (TIFFs and PDFs)
- Multiple Print Options: Slipsheets for document breaks, mix simplex-duplex, page-size and machine staples, auto-page size detect
- Create OCR Text, searchable or graphic PDFs with bookmarks, single or multi-page TIFFs
- Quality Control module assures greater accuracy
- Edit and customize filenames
- Simple indexing
- Print billing date for cost recovery

## Ribstone Scan-to-Print Features

- A touch-screen interface requires minimal training
- Scan & Paginate (Bates number) at machine rated speeds. Bates numbering feature allows for several placement and font options
- Customized text messages can be added with multiple placement and font options
- The traditional process of “copy-label-copy” can be eliminated. No more uneven placement, raised labels or time lost to rescanning documents
- Capture billing data for cost recovery

## Ribstone Image-Printer Features

- A touch-screen interface requires minimal training.
- Print TIFF, multi-page TIFF & PDF images from CD-Rom or network drive at machine rated speed
- Bates numbering feature allows for several placement and font options
- Use loadfiles to insert slipsheets or machine staples to mark document breaks
- Endorse prints with filenames, loadfile endorsements or Bates numbers
- View and edit loadfiles
- Capture billing data for cost recovery

## The Ribstone Advantage

- An intuitive turnkey easy-to-use solution
- Touch-screen interface means increased run times, reduced training time, improved accuracy and increased profits
- Fits seamlessly with your current production workflow
- Provides the full range of imaging and image processing solutions for your litigation clients
- Increases speed and accuracy at the same time
- Networked Ribstone Units can transform your production environment
- The full range of imaging and processing tasks can be completed at just one workstation
- Customized Print Options allow you to insert slipsheets and machine staples
- The Ribstone Commitment to quality and customer support
- Cost recovery features assist you with capturing and exporting billing data

## Options

Ribstone Systems offers **Ribstone Capture**, **Ribstone Scan-to-Print** and **Ribstone Image-Printer** as standalone applications or as bundled applications.

When these applications are bundled, your business will have the most powerful, stable and advanced image processing technology available anywhere.

Ribstone Systems can also network multiple scan stations for greatly increased productivity and flexibility. Multiple users can process sections of large litigation jobs at separate stations in a fraction of the time required to process such jobs at one workstation.
